THE BUZZ ABOUT INSULATORS

GLASS INSULATORS ARE NO LONGER MANUFACTURED.
 SOME GLASS INSULATORS ARE OVER 100 YEARS OLD. EACH ONE IS UNIQUE.
 RAILROAD HARDWARE AND INSULATORS ARE PART OF AMERICA'S RAILROAD HISTORY

HISTORY

Glass insulators are a fascinating part of the industrial revolution and communications. Although they are relics of an old technology, found mostly along old rail and abandoned telegraph lines, they have a historical significance to the telecom industry worldwide.

The oldest insulators pre-date the Civil War. Companies such as Hemingray, Brookefield, Kerr, Armstrong, Tatum & Pyrex manufactured them. They were produced by the millions until the 1970's. Some were experimental or produced in limited quantities, some are extremely rare, and many over 100 years old and collected worldwide.

There are many nuances in the styles, colors and uses of glass insulators. Each has a unique shape, design and industrial form that track the industry, development, technology and innovation.

DESCRIPTION

Insulatorlights are RECLAIMED & RE-PURPOSED glass insulators. Insulators are cleaned, polished, drilled, fixtured and ready to use. Insulatorlights are ready to hang and come with bulbs, base & mounting instructions.

DELIVERY 2-3 weeks or sooner depending on order.
